

HELPS WITH BOTH ACUTE AND CHRONIC INJURIES:

- Injuries and dislocations of joints
- Torn muscle or tendon, sprains, strains, muscle spasms
- Arthritis
- Oedema, haematomas
- Postoperative swelling

“I like the quick delivery and rapid results from the treatment on my patients for pain and inflammation management. Kaasen has provided me with another avenue to treat people to help them with rehabilitation.”

Jenny Borley, Cardiac Nurse

“We are using CryoStimulation as an integral part of our physical therapy treatments, with great results. In many cases the CryoStimulation has relieved pain and reduced inflammation more quickly than other methods of treatment. We highly recommend CryoStimulation as a part of physical therapy treatment to any therapist.”

Agnieszka Hawrysz,
Sports Injury Clinic Physiotherapist,
Thorndale Medical Centre, Dublin

WORLD'S MOST VERSATILE CRYOSTIMULATION DEVICE

We combined the most advanced science with the best practice to create Kaasen™.

Kaasen™ is the result of advanced medical research and innovative engineering bridged together by TruCryo™.

Designed in the UK and CE approved. Patent pending.

REVOLUTION IN CRYOSTIMULATION

Immediate and long-lasting pain relief

Increased mobility and faster recovery

WORLD'S BEST LOCALISED CRYOSTIMULATION DEVICE

Kaasen™ is unique in its ability to rapidly deliver localised ICE and COMPRESSION.

Utilising carbon dioxide at -78°C and 50 bar pressure, the tissues are cooled to 4°C in under 30 seconds, causing Thermal Shock.

The constriction of vessels and muscles slows the blood flow and forces the immune and hormonal systems to respond.

Immediately the blood vessels dilate to around four times their usual size. This floods the area with blood, which is rich in oxygen, hormones, nutrients and activated enzymes.

The healing process has begun.

THIS IS TRUE CRYOSTIMULATION.

TRUE CRYOSTIMULATION

BENEFITS

PAIN RELIEF

In reaction to the extreme cold, hormones including adrenaline and B-Endorphines are released which are powerful natural pain killers. This provides immediate pain relief.

REDUCES SYSTEMIC INFLAMMATION

Stimulates immediate improvement in blood flow and lymphatic drainage. Promotes reduction of haematomas, oedemas and swellings.

MUSCLE RELAXATION

Reduced systemic inflammation reduces the muscle tension, which increases the range of movement and allows faster rehabilitation.

FEEL GOOD FACTOR

Encourages a favorable biological response to the cold stress. This has been linked to improved levels of well-being.

REVOLUTIONISE YOUR TREATMENT WITH KAASEN™

RESULTS ARE IMMEDIATE AND
DEPENDING ON THE CONDITION
LAST FROM SEVERAL HOURS
TO DAYS AFTER ONE
SINGLE TREATMENT.

DESIGN FEATURES

- Thermal shock indication LED's
- Dual skin temperature sensors
- Advanced proximity sensors
- Automatic shut off mechanism
- Interchangeable nozzle attachments
- Rechargeable battery
- Digital Screen

Six attachments with different functions allow to tailor the most suitable therapy for a wide range of conditions.

Cryotherapy applied via Kaasen is the most effective modality to date that I have introduced to my clients. And they love it."

David Jenkins,
Professional Sports Therapist, Scotland
